POSITION SUMMARY

Set up and operate a variety of machine tools to produce precision parts and instruments. Includes precision instrument makers who fabricate, modify, or repair mechanical instruments. May also fabricate and modify parts to make or repair machine tools or maintain industrial machines, applying knowledge of mechanics, shop mathematics, metal properties, layout, and machining procedures.

ESSENTIAL FUNCTIONS

Reasonable Accommodations Statement

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. Reasonable Accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

Essential Functions Statement(s)

- Calculate dimensions and tolerances using knowledge of mathematics and instruments such as micrometers and vernier calipers.
- Machine parts to specifications using machine tools such as lathes.
- Measure, examine, and test completed units to detect defects and ensure conformance to specifications, using precision instruments such as micrometers.
- Set up, adjust, and operate all of the basic machine tools and many specialized or advanced variation tools to perform precision machining operations.
- Align and secure holding fixtures, cutting tools, attachments, accessories, and materials onto machines.
- Monitor the feed and speed of machines during the machining process.
- Study sample parts, blueprints, drawings, and engineering information to determine methods and sequences of operations needed to fabricate products and determine product dimensions and tolerances.
- Select the appropriate tools, machines, and materials to be used in preparation of machinery work.
- Lay out, measure, and mark metal stock to display placement of cuts.
- Observe and listen to operating machines or equipment to diagnose machine malfunctions and to

determine need for adjustments or repairs.

- Check work pieces to ensure that they are properly lubricated and cooled.
- Maintain industrial machines, applying knowledge of mechanics, shop mathematics, metal properties, layout, and machining procedures.
- Position and fasten work pieces.
- Operate equipment to verify operational efficiency.
- Install repaired parts into equipment or install new equipment.
- Clean and lubricate machines, tools, and equipment to remove grease, rust, stains, and foreign matter.
- Program computers and electronic instruments such as numerically controlled machine tools.
- Set controls to regulate machining, or enter commands to retrieve, input, or edit computerized machine control media.
- Confer with engineering, supervisory, and manufacturing personnel to exchange technical information.
- Dismantle machines or equipment, using hand tools and power tools, to examine parts for defects and replace defective parts where needed.
- Establish work procedures for fabricating new structural products, using a variety of metalworking machines.
- Support metalworking projects from planning and fabrication through assembly, inspection, and testing, using knowledge of machine functions, metal properties and mathematics.
- Confer with numerical control programmers to check and ensure that new programs or machinery will function properly, and that output will meet specifications.
- Fit and assemble parts to make or repair machine tools.
- Evaluate experimental procedures and recommend changes or modifications for improved efficiency and adaptability to setup and production.
- Design fixtures, tooling, and experimental parts to meet special engineering needs.
- Prepare working sketches for the illustration of product appearance.
- Set up and operate metalworking, brazing, heat-treating, welding, and cutting equipment.
- Test experimental models under simulated operating conditions for such purposes as development, standardization, and feasibility of design.
- Operate a jib or overhead crane.
- **May grind a part with a hand-held grinder, pencil grinder, other grind tool. Balancing parts on an automatic balancing machine.
- Comply with established safety policies and procedures. Wear required Personal Protective Equipment as directed. Use appropriate tools designed for their specific job tasks. Provide feedback related to hazard assessments and/or accident investigations.
- Act in accordance with Patterson's Company policies (ex. Harassment, Equal Employment Opportunity, Ethics, etc.).
